

Experiment 6

Aim:

To design and build a single internal "Command Center" Page in Zoho Creator for the existing "Student Admission Enquiry" application, demonstrating the correct usage of all eleven Page Builder elements — Panel, Board, Chart, Gauge, Search, Form, Report, Snippets, Button, Widgets, and Viewer — so that the Admission Cell has one unified workspace to monitor, manage, and act on enquiry data.

Page Elements Used:

Page Element	Element Name
Panel	Command_Center_Main_Panel
Board	Enquiry_Status_Board
Chart	Course_Popularity_Chart_Widget
Gauge	Seat_Fill_Target_Gauge
Search	Applicant_Search_Bar
Form	Quick_Counter_Enquiry_Form
Report	Full_Enquiries_Report
Snippets	Admission_Process_Checklist_Snippet

Page Layout (Section-wise)

Section 1 — Overview Strip

- ☐ Seat Fill Target Gauge (Gauge element)
- ☐ Course Popularity Chart Widget (Chart element)
- ☐ Applicant Search Bar (Search element)

Section 2 — Processing Workspace

- ☐ Send Counselling Reminder Button (Button element)
- ☐ Enquiry Status Board (Board element)

Section 3 — Detailed Data

- ☐ Full Enquiries Report (Report element)

Section 4 — Reference & Quick Actions (Sidebar)

- ☐ Admission Process Checklist Snippet (Snippets element)
- ☐ Marksheet Certificate Viewer (Viewer element)
- ☐ Quick Counter Enquiry Form (Form element, expandable tab)

Section 5 — Operations Strip

- ☐ Seat Availability and Scholarship Widgets (Widgets element)

All sections above are laid out within the `Command_Center_Main_Panel`, which serves as the single structural Panel wrapping the full page.

6. Configuration & Access Rules

- ☐ Panel (`Command_Center_Main_Panel`): configured with role-based visibility so only Admission Cell and department-coordinator accounts can access the page.
- ☐ Board (`Enquiry_Status_Board`): each column mapped to a value of the Status field; dragging a card between columns updates the underlying record instantly.
- ☐ Chart (`Course_Popularity_Chart_Widget`): set to auto-refresh at a fixed interval so the Admission Cell head always sees current course demand without manually reloading.
- ☐ Gauge (`Seat_Fill_Target_Gauge`): total seat count configurable per academic year; gauge color changes (e.g., red to green) as admissions approach full capacity.
- ☐ Search (`Applicant_Search_Bar`): configured to search across Student Name, Register/Roll

Number, and Preferred Course fields simultaneously.

☐ Form (Quick_Counter_Enquiry_Form): identical validation rules to the standard Admission_Enquiry_Form, ensuring data consistency regardless of entry point.

☐ Report (Full_Enquiries_Report): includes export-to-Excel capability restricted to Admission-Cell-head-level accounts only.

☐ Snippets (Admission_Process_Checklist_Snippet): centrally managed so that any edit to the process steps or document checklist automatically reflects wherever the snippet is reused.

☐ Button (Send_Counselling_Reminder_Button): triggers a workflow that messages only applicants with a counselling session scheduled within the next 48 hours, to avoid unnecessary reminders.

☐ Widgets (SeatAvailability_And_Scholarship_Widgets): seat availability refreshes in real time as admissions are confirmed; scholarship widget pulls from the current year's eligibility criteria.

☐ Viewer (Marksheet_Certificate_Viewer): configured to display the latest uploaded marksheet or certificate without requiring a manual link update each time a new file uploaded.

7. Workflow Summary

☐ Step 1: An Admission Cell staff member opens the Admission_Command_Center_Page and

immediately sees the Seat Fill Target Gauge and Course Popularity Chart for a quick status check.

☐ Step 2: If they need to find a specific applicant, they use the Applicant Search Bar rather than scrolling through the full report.

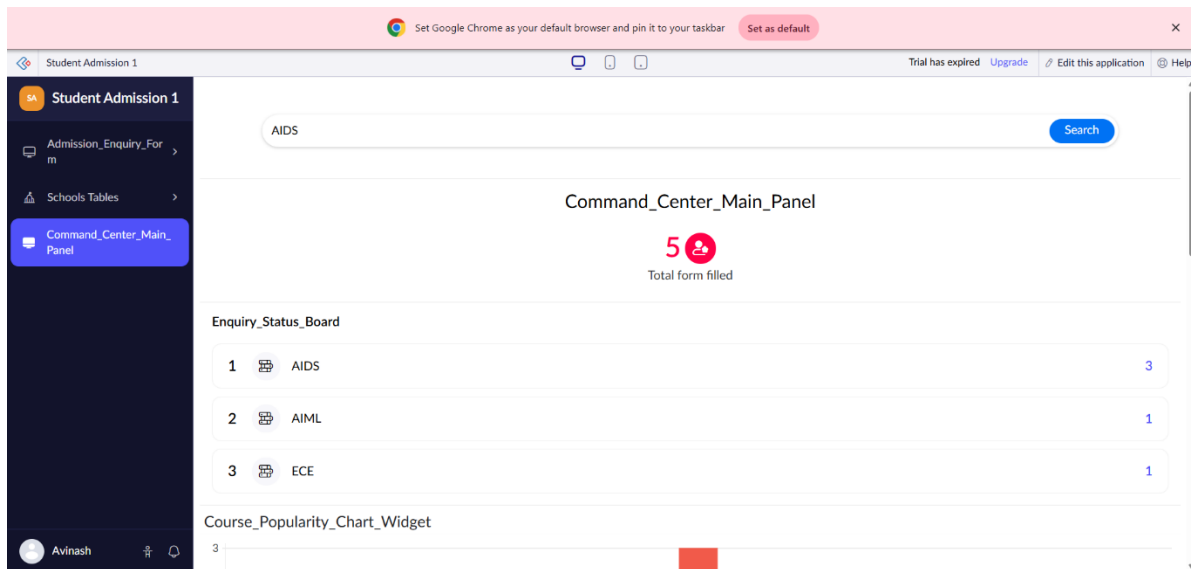

☐ Step 3: As document verification proceeds, staff drag applicant cards across the Enquiry Status Board to reflect the current stage.

☐ Step 4: For applicants with counselling sessions scheduled soon, staff click the Send Counselling Reminder Button to trigger bulk reminder messages.

☐ Step 5: For a walk-in applicant, staff use the Quick Counter Enquiry Form directly from the command center instead of navigating to a separate page.

☐ Step 6: For deeper analysis or export, the Admission Cell head scrolls to the Full Enquiries Report.

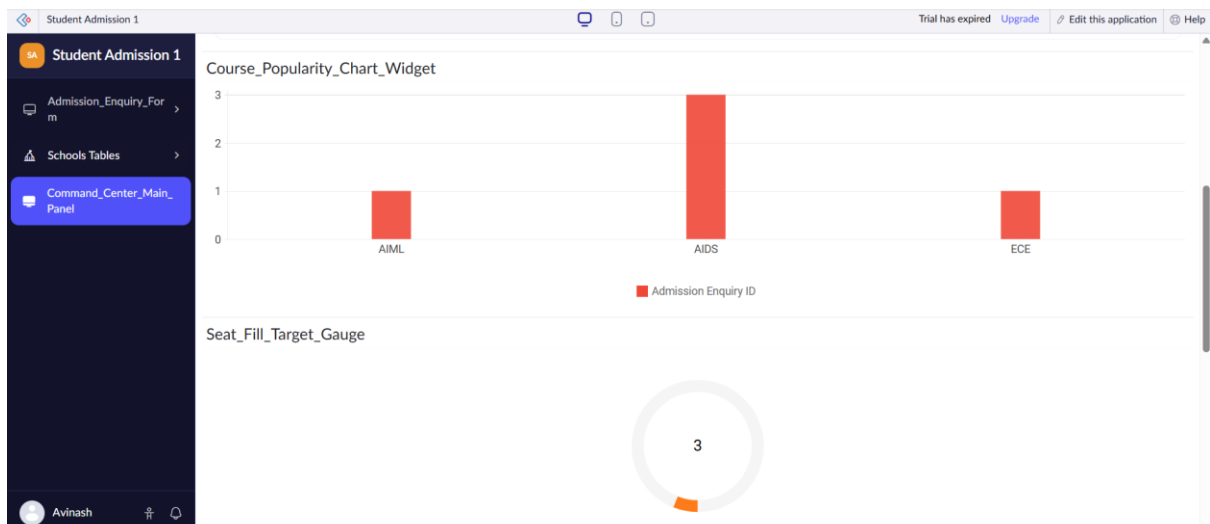

Step 7: When a parent asks about required documents or scholarship eligibility, staff refer to the Admission Process Checklist Snippet, check the Scholarship Widget, and open the Marksheet Certificate Viewer to verify uploaded documents.

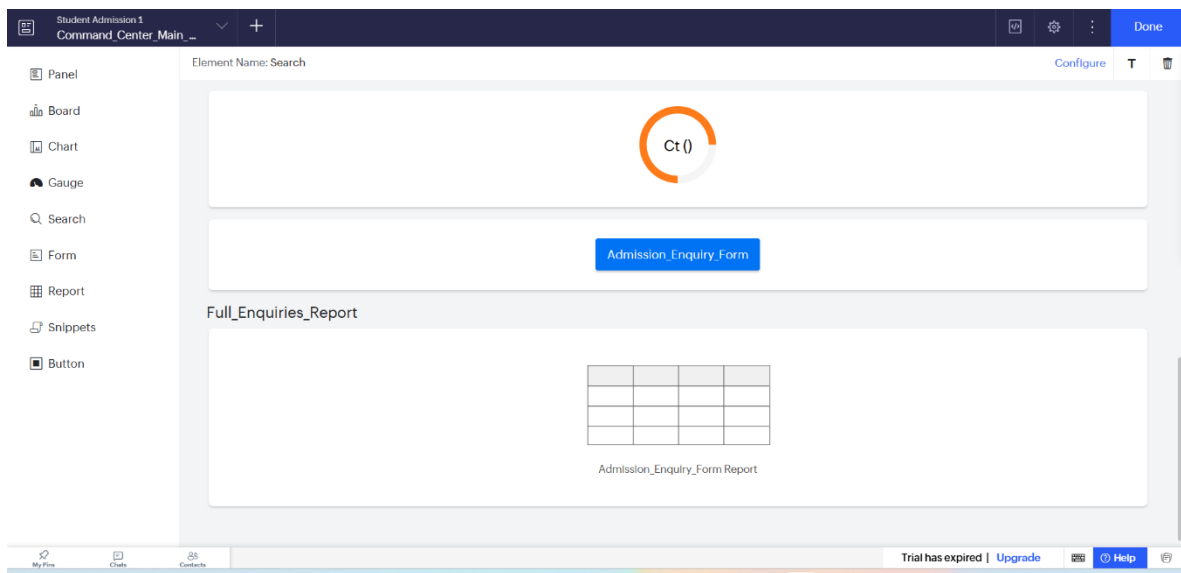

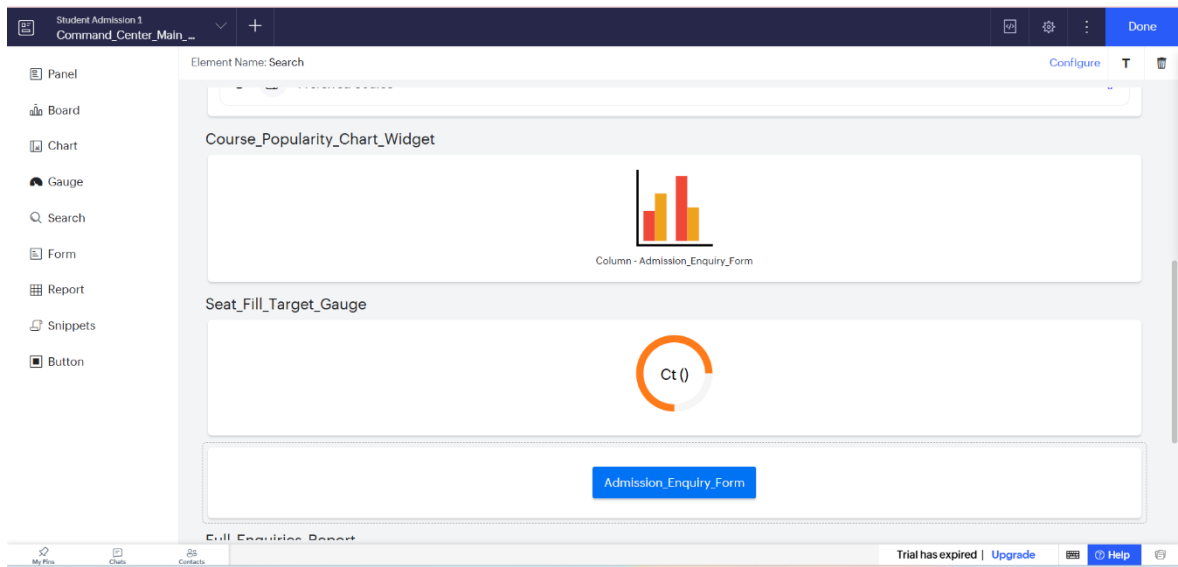

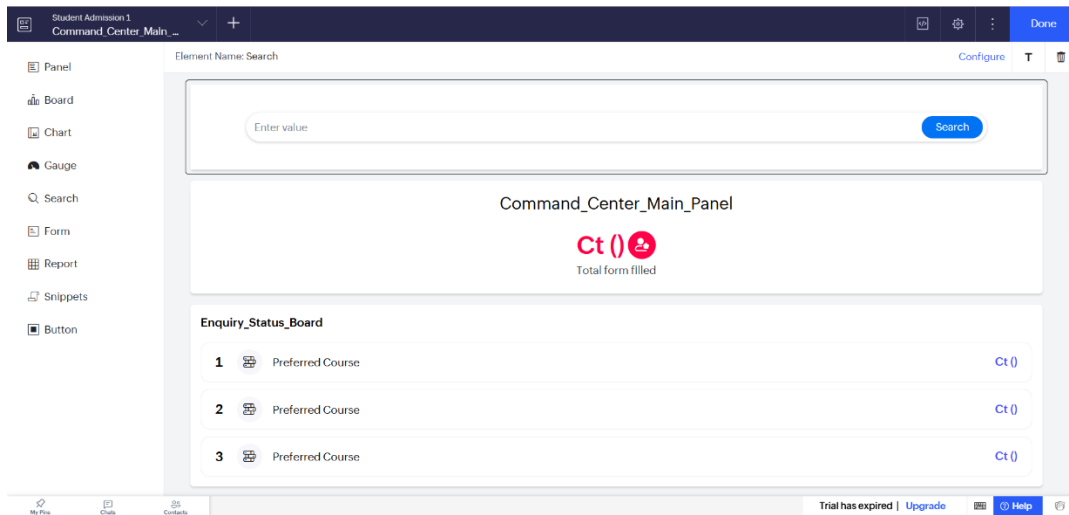

The screenshot shows the 'Admission Enquiry Form Report' table. The table has the following columns: Student Name, Date of Birth, Email, Contact Number, Residential Address, Guardian Name, and Areas of Interest. The data is as follows:

Student Name	Date of Birth	Email	Contact Number	Residential Address	Guardian Name	Areas of Interest
somu R	29-Jul-2006	smaheskala883@gmail.com	+912233445566	no 11, c.v.naidu road, thiruvallur, tamil nadu, 602001, India	Ram	Sports

Showing 3 of 3

Result:

A single internal "Command Center" Page in Zoho Creator for the existing "Student Admission Enquiry Form" is created.
